

KS4 - Year 10 and Year 11 - Overview and Information

The two tables below show the curriculum intent in terms of which group would be following which specific Scheme of Learning. Obviously, this is not fixed but is discussed, adapted depending on prior knowledge, ability of the group and experiences they have had in the past. For example, with the effects of Covid-19 in March 2020. On its own it is simply a document, but it is how we use the structure and the lesson content which is important. These units of work will also depend on Year 9 and the outcomes at the end of that year. The checking of assumed knowledge will also play a large factor in the timing of all units. We know that knowledge builds on knowledge, and the principles of the faculty is that we will not knowingly leave students behind. If assumed knowledge is in fact not secure, then we will and must go back and reteach, relearn, adapt all teaching to ensure prior knowledge is secure. The building of a student's schema is what this curriculum is designed to do. There are 4 teaching groups in both Year 10 and Year 11, and they are set on outcomes at the end of Year 9. In each Year group they receive 9 hours of Maths lessons over 2 weeks.

In Year 10;
